

Material and Clinical Checklists for an Endopeel® Hands-On Workshop

This document provides the official material requirements, patient preparation checklist, physician checklist, and minimum room requirements for Endopeel® hands-on workshops. It is intended for on-site use and internal documentation.

Table Material Checklist (per Treatment Station)

- Sterile non-woven gauzes (10 × 10 cm), in bulk
- Sterile cotton pads
- Permanent markers (red, white, blue, black; optional yellow)
- Marker sharpener
- 1 ml syringes (Luer lock)
- Needles: 30G × 13 mm (face) and 27G (body)
- Disposable cups
- Endopeel® solution – 2 × 10 ml
- Post-procedure cream (Aseptiskin® or equivalent)
- Skin disinfectant without alcohol
- Examination gloves (latex-free)
- Protective absorbent underpads (approx. 20 × 40 cm)

Patient Checklist

- Wear non-sterile disposable medical clothing (gown or cover)
- No makeup, creams, or topical products on the treatment area
- Pre-procedure clinical photographs taken at least 10 minutes before treatment
- Signed written informed consent obtained and filed
- No fever and no active infection

Physician Checklist

- Scrubs or appropriate clinical clothing
- Surgical cap
- Gloves
- Strict hygiene compliance
- Adherence to clinical discipline and protocol

Minimum Room Requirements

- Electricity and adequate lighting
- Sufficient space between treatment beds
- 1 treatment bed for every 2 physicians
- 1 table per bed (disposable or washable surface)
- Sharps container (needles/syringes) at each station
- Waste bin for contaminated disposables (gauzes, pads)
- Neutral background or curtain behind each bed (recommended for standardized photography)
- 1 stool or chair per treatment station

Workshop Compliance

The workshop organizer is responsible for ensuring that all material, room setup, and safety requirements are fulfilled before the first patient is brought into the treatment area.
